**Medi-Dose® / EPS® Announces New ENFit™ Compliant and Compatible Products**

**Ivyland, PA, Winter 2017** – Reducing misconnections with medical device tubing is vital to improving patient safety. New international standards have been developed to ensure safe and secure connections between enteral feeding devices. Medi-Dose/EPS is pleased to support this important initiative by marketing the NeoConnect™ line of ENFit Compliant and Compatible Products.

Our Enfit Compliant **NeoConnect Pharmacy Syringes** range from 1 mL to 60 mL, and are available sterile or non-sterile in ultraviolet inhibitor amber with white graduations, or non-sterile in clear with purple graduations. All syringe graduations are Metric-Only to comply with the ISMP Best Standards Guidelines.

Our ENFit compatible **Oral Administration Tips** and **Pharmacy Caps** help ensure proper dosing accuracy throughout the filling and dispensing process while our ENFit compatible **Syringe-to-Syringe Couplers** enable you to connect two Neoconnect syringes to facilitate patient-specific dosing.

“The proper delivery of medication is of paramount concern to patients and health care professionals”, said Bob Braverman, President. “The NeoConnect Enfit Compliant and Compatible product line helps pharmacy and all those involved with the safe handling of enteral medication meet these goals.”

For more information on the Medi-Dose/EPS line of NeoConnect Enfit products, contact Robert Braverman or visit [www.medidose.com](http://www.medidose.com).

**ABOUT MEDI-DOSE, INC. / EPS, INC.** – For over 45 years, Medi-Dose / EPS has been working with pharmacists and health care professionals to develop cost-effective solutions that promote medication safety and error prevention.
