Medi-Dose, Inc. / EPS, Inc. Announces New Line of USP <800> Labels

Ivyland PA – Spring 2022 – Clearly identifying medications requiring special handling, such as those covered by USP <800>, is important for the safety of your staff and your patients. To help protect everyone involved in dispensing and administering these meds, Medi-Dose/EPS has introduced a new line of USP <800> labels promoting the proper handling of hazardous drugs (HDs).

These labels feature dedicated messages and bold color schemes, alerting health care professionals to observe caution when handling, transporting, and disposing of hazardous medications. Pharmacies, hospitals, clinics, physicians' practices, and veterinary practices use these USP <800> labels to promote environmental protection and, most importantly, patient & worker safety.

“We’re always working to improve the medication packaging experience for pharmacists and nurses, while helping to reduce medication errors”, says Robert Braverman, President of Medi-Dose. “This new line of UPS <800> Labels again demonstrates our commitment to maintaining medication and practitioner safety while enhancing the efficiency of your practice and your budget.”

For more information on all EPS Labels and complementary products, contact Robert Braverman or visit www.medidose.com.
